#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tateyama et al. (5,845,144) in view of Hawkins et al. (6,312,099).

With respect to Claims 1 and 3, Tateyama teaches the keyboard 102 and the housing 101 on the front page diagram and ink jet printer arranged in the housing in figure 7, the ink distribution arrangement 5001 in figure 37 and a feed mechanism 5024 in figure 37. Tateyama teaches all the claim limitations except that the inkjet printer is a page width printer. Hawkins teaches an inkjet page width printer in column 1, lines 33-35. It would have been obvious to one of ordinary skill in the art to incorporate the page width printer of Hawkins into the invention of Tateyama because page width printers are desirable for there high speed printing as taught by Hawkins in column 1, lines 35-36. With respect to Claim 2, Tateyama teaches the rectangular housing on the front page diagram, the input slot 101a on the front page diagram and the exit slot opposite the input slot in figure 32. With respect to Claim 5, Tateyama teaches the computer (information processing apparatus) in the title.

3. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tateyama in view of Hawkins as applied to claim 1 above, and further in view of Isobe et al. (5,579,092).

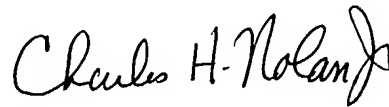

With respect to Claim 4, Tateyama and Hawkins teach all the claim limitations except for the endless belt driven by a roller assembly. Isobe teaches the endless belt 9 driven by roller assembly 10 and 11 on the front page diagram. It would have been obvious to one of ordinary skill in the art to incorporate the endless belt and roller assembly of Isobe into the invention of Tateyama and Hawkins for its desirability in correcting media poison errors as taught by Isobe in the Abstract.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles H Nolan, Jr. whose telephone number is 571-272-2171. The examiner can normally be reached on Monday through Thursday 8:00 AM to 6:30 PM.
